## **Canon launches new ultra-compact portable scanner with enhanced feeding and software connectivity**

*Canon imageFORMULA P-208II*

**LONDON, 15<sup>th</sup> December, 2014** - [Canon Europe](#), world-leader in imaging solutions, today enhances its scanning portfolio with the new imageFORMULA P-208II portable scanner.

Replacing the imageFORMULA P-208, the compact and stylish P-208II portable scanner is the perfect choice for travelling executives and home users. The newly-designed paper feeder tray makes it easier to load multiple documents onto the 10-sheet automatic document feeder (ADF), while the device offers the same productive double-sided scanning speeds of up to 16ipm as its predecessor. The bundled software has been updated with new versions of CaptureOnTouch (Ver. 3), CaptureOnTouch Lite (Ver. 3) and BizCard, providing users with a more simplified scanning operation, enhanced post-scan image processing and connectivity to popular cloud applications such as Dropbox, OneDrive and Evernote.

Tim Brosnihan, European Document Scanning Solutions Marketing Manager, Canon Europe, comments: "We've seen a lot of changes in the document capture market over the years, mostly driven by changing IT technologies, infrastructures and business working practices. Businesses are now constantly looking for new solutions to fast-track the processing of paper-based information, whether employees are visiting clients, working in remote branches or from home. Our new imageFORMULA P-208II device combines productive USB-powered scanning with an ultra-compact, lightweight design for efficient processing of document based information whether scanning from the home, on the road or in the office. "

The P-208II is Windows and Mac compatible, includes standard ISIS and TWAIN drivers, and is Kofax VirtualReScan® (VRS) ready.

The new imageFORMULA P-208II is now available through all Canon sales offices and selected distributor partners across Europe.

– ENDS –

### About Canon Europe

Canon Europe is the regional sales and marketing operation for Canon Inc., represented in 116 countries and employing 17,000 people across Europe, the Middle East and Africa (EMEA).

Founded in 1937 with the specific goal of making the best quality camera available to customers, Canon's tireless passion for the Power of Image has since extended its technology into many other markets and has established it as a world leader in both consumer and business imaging solutions. Its solutions comprise products, ranging from digital compact and SLR cameras, through broadcast lenses and portable X-ray machines, to multi-function and production printers, all supported by a range of value added services.

Canon invests heavily in R&D to deliver the richest and most innovative products and services to satisfy customers' creative needs. From amateur photographers to professional print companies, Canon enables each customer to realise their own passion for image.

Canon's corporate philosophy is [Kyosei](#) – 'living and working together for the common good'. In EMEA, Canon Europe pursues sustainable business growth, focusing on reducing its own environmental impact and supporting customers to reduce theirs using Canon's products, solutions and services. Canon has achieved global certification to ISO 14001, demonstrating a world-class environmental management standard.
